25	(80)(79) vibrio infection (other than cholera) – 24 hours;
26	(81)(80) whooping cough – 24 hours;
27	(82)(81) yellow fever – 7 days; and
28	(83)(82) zika virus – 24 hours.
29	(b) For purposes of reporting, "confirmed human immunodeficiency virus (HIV) infection" is defined as a positive
30	virus culture, repeatedly reactive EIA antibody test confirmed by western blot or indirect immunofluorescent antibody
31	test, positive nucleic acid detection (NAT) test, or other confirmed testing method approved by the Director of the
32	State Public Health Laboratory conducted on or after February 1, 1990. In selecting additional tests for approval, the
33 24	Director of the State Public Health Laboratory shall consider whether such tests have been approved by the federal
34 35	Food and Drug Administration, recommended by the federal Centers for Disease Control and Prevention, and
33	endorsed by the Association of Public Health Laboratories.

1 (c) In addition to the laboratory reports for Mycobacterium tuberculosis, Neisseria gonorrhoeae, and syphilis specified

- 2 in G.S. 130A-139, laboratories shall report using electronic laboratory reporting (ELR), secure telecommunication, or
- 3 paper reports.
